AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in this application.

- 1. (Original) Use of an extract of animal, plant or microorganism-produced origin that comprises docosahexaenoic acid as active substance for the manufacture of a medicament for the treatment of lipodystrophy in a mammal, said medicament being administered to a patient who is concomitantly receiving a highly active anti-retroviral therapy (HAART).
- 2. (Currently Amended) Use according to Claim 1, characterised in that wherein the amount of docosahexaenoic acid in said extract is higher than or equal to 100 mg/day.
- 3. (Currently Amended) Use according to Claim 2, characterised in that wherein said amount of docosahexaenoic acid in said extract is 4 grams/day.
- 4. (Currently Amended) Use according to any of claims 1 to 3 claim 1, in which the medicament promotes adipocytary differentiation.
- 5. (Currently Amended) (Currently Amended) Use according to any of claims 1 to 3 claim 1, in which the medicament has hypolipemiant activity.
- 6. (Currently Amended) Use according to any of claims 1 to 3 claim 1, in which the medicament reduces the alpha tumour necrosis factor.
- 7. (Currently Amended) Use according to any of claims 1 to 3 claim 1, in which the medicament has antihypertensive activity.

- 8. (Original) Use according to Claim 1, in which the medicament is capable of inhibiting the toxic effects caused by the administration of an antiretroviral drug.
- 9. (Original) Use according to Claim 1, in which said docosahexaenoic acid is present in said extract in a concentration which ranges between 5% and 100% (w/w).
- 10. (Original) Use according to Claim 9, in which said docosahexaenoic acid is present in said extract in a concentration which ranges between 50% and 100% (w/w).
- 11. (Currently Amended) Use according to any of the preceding claims claim 1, in which the medicament is administered orally.
- 12. (Currently Amended) Use according to any of the preceding claims claim 1, in which the drug is administered parenterally.
 - 13. (Original) Use according to Claim 1, in which said mammal is a human.
 - 14. (Original) Use according to Claim 13, in which said human is infected with the HIV virus.
